NAME

dvitomp – convert a TeX DVI file to a MetaPost MPXFILE

SYNOPSIS

```
dvitomp [OPTIONS] dvifile[.dvi] [mpxfile[.mpx]]
mpost --dvitomp dvifile[.dvi] [mpxfile[.mpx]]
```

DESCRIPTION

dvitomp translates the given *dvifile* to a MetaPost MPXFILE. The default *mpxfile* is the basename of *dvifile* extended with **.mpx**.

OPTIONS

-help write usage summary and exit.

-version

output version information and exit.

BUGS

Email bug reports to metapost@tug.org.
